# Executive Report

File Touches Over Time by Authors

Over the past few months, there have been updates that try to improve the functionality and maintainability. Some of these updates were to help optimize Gradle settings, script configurations, and typing errors in the readme file. There has also been a plethora of contributors and some of the recent ones have been Niall Scott, Artsem Kurantsou, and Scott Alexander-Bown just to name a few. There has been consistent development and multiple commits specifically in September and October of 2024. We can also see from the graph that many of the contributors have touched about 5-10 files on average. Some of the git commands I used to help with this report are commands such as git shortlog -s -n which summarizes contributions by author, or git diff –stat, which highlights the changes between releases.
